

## LIQUID-CRYSTALLINE POLYESTER SOLUTION COMPOSITION

### ABSTRACT OF THE DISCLOSURE

A liquid-crystalline polyester solution composition comprises an aprotic solvent and liquid-crystalline polyester. The liquid-crystalline polyester includes at least one of repeating unit selected from the group consisting of a repeating unit derived from aromatic diamine, a repeating unit derived from aromatic amine having a hydroxyl group and a repeating unit derived from aromatic amino acid, in from 10 to 35 mol% in the liquid-crystalline polyester.
